PUB-NO: JP02002334280A
DOCUMENT-IDENTIFIER: JP 2002334280 A
TITLE: PROCESSING METHOD FOR SETTING PRODUCT OR PRODUCT COMBINATION ON PC

PUBN-DATE: November 22, 2002

INVENTOR-INFORMATION:
NAME   COUNTRY
MACHAU, NORBERT
ZHOU, HONG
LANG, ROBERT

INT-CL (IPC): G06F 17/60

ABSTRACT:

PROBLEM TO BE SOLVED: To provide a processing for setting a product or a product
combination on a PC connectable or connected through a data link to the data processor of
a product manufacturer, a computer in other words.

SOLUTION: The product or the product combination and/or a single component group is
displayed on the screen of the PC by a setting program inside the computer. The program
is a menu type in which the product or the product combination can be selected for each
system concept, and when dimensioning and work parameters (11 and 12) are selected and/or
inputted, the single component group required for that is automatically selected from the
single component groups present in the data bank of the computer or is automatically set
or applied. The single component group as the result is displayed or listed on the
screen.
